

Clark Forklift

At present, there are no less than 350,000 Clark forklifts performing globally, and in excess of 250,000 in service in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, handles more than 120,000 specialized components intended for 20 distinctive designs of lift trucks and automated equipment. Your regional Clark Dealer is your total source for availability of all your parts requirements supplied by Clark Totalift.

Clark has a phenomenal Parts Distribution team. The components warehouses are conveniently positioned in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their customers and their sellers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Motivated to supply the highest level of value and service to our customers, Clark remains on the leading edge when it comes to improving productivity and benefiting performance.

Clark Totalift has a very amazing global support network. With over 550 locations globally, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their customers predominates the material handling market.

Clark proudly remains an progressive leader of the material handling industry, revolutionizing safety features such as the operator restraint system. This exceptional commitment to safety is currently a customary feature on every forklift.

Clark has a unrelenting mission to possess the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its manufacturing plants. Also, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any number of environmental restrictions, thus placing them in a dominant market position.

Resource Efficient Manufacturing

Clark has selected the system of "Lean Production" at all of its assembly facilities because this method is particularly economical and permits minimal use of resources. Developed to ensure maximum efficiency, this system is intended to discover and acknowledge the most effective methods for production facility management. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

Engine Design

By working collectively, Clark's product suppliers and engineers communicate towards improving product efficiency while minimizing expenses. The new value engineering agenda combines modern product development and provides improved client support and service within the industry.
