

## Victoria Scissor Lift Operator Certification

Victoria Scissor Lift Operator Certification - North American regulators recommend that worksites need operators of booms, scissor lifts or aerial work platforms to get certification training. Scissor lift operator certification is not mandatory, but there are benefits to making sure that this particular training is provided to all the operators.

Scissor lift refers to a platform which moves vertically to allow workers to have access to high levels. Scissor lifts are designed with a pantograph - connected, folding supports in an 'X' pattern. Upward movement occurs when pressure is applied to the outside of the lowest set of supports, propelling the work platform vertically by elongating the 'X' pattern. A bridge extends from some platforms to allow convenient access to the work area.

The platform returns to the ground by release of a manual valve. The platform descends through simply releasing the pneumatic or hydraulic pressure. This is the key reason that scissor lifts are the best machinery at worksites.

Operators which are both inexperienced or experienced would be able to get some benefit from proper scissor lift training. A scissor lift operator certification course could be particularly designed to accommodate for those lifts utilized at your workplace. The trainees' certificate of training will list the models of machinery on which they trained.

The classroom instruction covers the following subject matters: authorization, attitude and rules and guidelines; introduction to scissor lift training; safety regulations and common hazards; Occupational Health and Safety; workbook and record of training (or likewise known as ROT)

The end of the in-class section is finished with a written exam.

The following areas practical hands-on training and instruction comprises: pre-operational check; safety equipment;; operator instruction manual; regular maintenance; function test checklist; and the practical session would conclude with a demonstration of proficiency.
